Awesome game, but i have one Major Problem. The video settings are completely unresponsive and i cant lower the resoultion or anything so the game tends to lag.. Good game! Lots of fun and laughter when playing multiplayer with your friends!

---

FIX and Languages : The new patch improves the menu position which will now be more left than on the videos to facilitate navigation for users with wide screens. It also turned out that these options are required The menu has been enriched with more languages. English Simplified Chinese Turkish German Russian French Spanish Polish Korean Japanese We apologize for the erroneous translations. If this is the case and you want help, then the list in English is lower. Mouse Emitter Background Clock Text Options Support Startwithwindows Movewithmouse Bloomintensity Backgroundcolor Colorintensity Gamemode Language Cameraxposition Camerayposition Community Website Allprojects Thankyou Version Clockactive Clockformat Showseconds Fontsize Resetposition Clockcolor Textactive Showkeyboard Textcolor Amount Speed Done Editparts Default Active Part Mousespeed Mousedistance Mouseforce Reverseforce Strength Frequency Scrollspeed Noise Thank you for cooperation.. More Content : We can say that "Energy Engine" has come very well on thousands of computers around the world. Thank you for many comments that help us in improving this project. There was a question about more content so we added what you asked for.. Last Day ! 20% OFF : This is the last moment to get our latest project at a promotional price. It will also help us create new productions. 24 hours left! The next possible promotion is in a few months. Thanks for your support.. FrightShow Fighter Idle Chess Story Cowpocalypse - Episode 1 Energy Engine PC Live Wallpaper You are Curator? : We really appreciate the roles of Steam Curators, thanks to which users can find interesting tutorials more easily. If you are a Steam Curator and would like to test our projects, please write to our e-mail (provided in contacts). We will gladly find out what you think about them. Each of our projects already has a small number of limited invitations, so it will be best if each curator receives an invitation to one of our titles. If you will be very dependent on the availability of subsequent titles because, for example, your group consists of more curators, please take this into account in the email. Unfortunately, we do not have enough invitations to make everyone happy . but we will try.. Fresh Release : The new exciting project is ready. We decided to build an editor that allows creating effective particles that react to the mouse. So we prepared ready scenes and their parts that can be modified. The project was created thanks to the asset that simulates the UltimateVFX particle movement. The work on this project was very nice, however, there was a delay by work on improving the wallpaper system so that more would not show fake antivirus reports . And we repaired it by moving the Energy Engine's premiere for another month. However, everything went well and the wallpaper is already in the store collecting great reviews. Thanks! The project will be improved and enriched with additional presets ready for change. We are happy to hear your suggestions if you have a nice idea or what to fix. This project finishes a certain stage for 3DM. From this moment, we will be working on a completely new and unique series of interactive wallpapers based on AI. You can find more information on our social media or website. Thank you all for support. This project was possible thanks to you.
